Docket Number: EERE-2021-BT-STD-0035 and EERE-2021-BT-TP-0036

Subject: Request a 45-day comment period extension for Air Cleaner Standards and Test Procedures
Request for Information

Dear Dr. Johnson:

This letter comprises the request of the Pacific Gas and Electric Company (PG&E), San Diego Gas and Electric (SDG&E), Southern California Edison (SCE), the Appliance Standards Awareness Project (ASAP), and the Association of Home Appliance Manufacturers (AHAM), (collectively, the Joint Commenters) to request a 45-day comment period extension on the United States Department of Energy (DOE)'s Air Cleaner Energy Conservation Standards and Test Procedures Request for Information (RFI).

The signatories of this letter acknowledge and appreciate DOE's work in pursuing new energy conservation standards and test procedures for air cleaners. The Joint Commenters are actively engaged in a negotiation regarding the scope, test procedure, and energy efficiency standards for this product and are working to develop substantive comments to the RFI consistent with our productive discussions. In addition to the facts that air cleaners would be a new product category and that there are numerous requests for comment raised in this RFI relating to test procedures and energy conservation standards, the Joint Commenters need more time to continue our discussions which we hope will be fruitful. An additional 45 days will not significantly slow down DOE's process and, should our negotiations prove fruitful, the additional commenting time will allow us to provide a recommendation to DOE that could lead to final energy conservation standards being adopted on an expedited timeline.

DOE mentioned the existence of the ENERGY STAR® Consumer Air Cleaner Program as evidence that stakeholders will already have well-formed thoughts on this product category. However, the RFI addresses issues that are beyond the scope of the current ENERGY STAR specification. While we appreciate DOE wanting to review the RFI responses prior to finalizing its coverage determination, we believe that DOE could still accommodate that with a 45-day extension.

In conclusion, we respectfully request a 45-day comment period extension for stakeholders to adequately respond to the RFI.

We look forward to developing detailed comments in response to this RFI, and we thank DOE for considering this request.

Sincerely,

Patrick Eilert
